^a Includes supplemental gaseous fuels.^b "Other" is the subtotal of 16 petroleum products consumed in the industrial sector. See a full description in the Technical Notes, Section 4, "Other Petroleum Products."^c Conventional hydroelectric power. Does not include pumped-storage hydroelectricity.

(s) = Value less than 0.05.

Notes: • Totals may not equal sum of components due to independent rounding. • Electricity generation by the

electric power sector from hydroelectric power, geothermal, wind, photovoltaic and solar thermal energy and wood and waste in billion kilowatthours are not shown on this table. Solar and geothermal energy and wood and waste consumed in the residential, commercial, and industrial sectors for electricity generation and other purposes are not available in physical units. The Btu equivalents of these energy sources are shown in Table S3.

Sources: Data sources, estimation procedures, and assumptions are described in the Technical Notes.
